Objective

Motivated Computer Science undergraduate with hands-on experience in Java, SQL, and web development, seeking a Software Developer role to build scalable and efficient applications. Strong in problem-solving, data structures, and real-world project development. Eager to contribute to high-impact solutions while continuously enhancing technical expertise.

INTERNSHIPS

- | | |
|--|-------------------|
| Intern, Tata Steel - Shavak Nanavati Technical Institute | 06/2024 – 07/2024 |
| <ul style="list-style-type: none">• Worked on end-to-end data handling pipeline, including data cleaning, preprocessing, and Microsoft Excel, ensuring data accuracy and consistency.• Developed and executed SQL queries on Oracle Database & MySQL for data manipulation, analysis, and storage; designed efficient tables to handle large datasets and improve query performance.• Automated data processing tasks using SQL procedures, including calculating real-time averages (5-minute intervals) and scheduling jobs to ensure continuous and efficient data updates. | Jamshedpur |

EDUCATION

- | | |
|--|-----------------------|
| Bachelor's of Technology- Computer Science and Engineering, | 2023 – 2027 |
| <i>Uttaranchal University</i> | Dehradun, Uttarakhand |
| <ul style="list-style-type: none">• CGPA - 8.9 (Till 5th Semester) | |

TECHNICAL SKILLS

Languages

JAVA, HTML, CSS, ,JavaScript ,OOPs ,OS, DBMS, DSA
in JAVA

Developer Tools

VS Code, IntelliJ IDEA, Github

Coding Platforms

LeetCode

Languages

- English
- Hindi

PROJECTS

- | | |
|--|-------------------|
| Expense Tracker & Budget Insights web application | 06/2025 – 06/2025 |
| <ul style="list-style-type: none">• Built an Expense Tracker web app using HTML, CSS, and JavaScript• Implemented add/edit/delete transactions with real-time balance updates• Added interactive charts for expense analysis and insights• Used localStorage for data persistence and filtering functionality | |

Class Scheduler Application

07/2024 – 07/2024

- Built a Class Scheduler web app using HTML, CSS, and JavaScript for managing weekly schedules.
- Implemented dynamic CRUD operations with real-time updates using JavaScript and DOM manipulation.
- Added input validation and conflict detection to prevent overlapping class schedules.
- Designed a responsive UI with local storage and filtering for efficient schedule management.

CERTIFICATIONS

- Web Development
- Cyber Security
